The NAFTA Handbook is provided by the U.S. Immigration and Naturalization Service Headquarters as reference material to assist immigration inspectors in processing applicants for admission under the North American Free Trade Agreement. Among the many sources of information listed in this manual are chapter 16 of the North American Free Trade Agreement, pertinent sections of 8 CFR, Operating Instructions, Inspectors Field Manual, Interim Decisions and Case Law Summaries NAFTA Interim and Final Rule, Implementation wires, and other pertinent memoranda.

In a 2009 study of the debt collection industry, the Commission concluded that the “most significant change in the debt collection business in recent years has been the advent and growth of debt buying.” “Debt buying” refers to the sale of debt by creditors or other debt owners to buyers that then attempt to collect the debt or sell it to other buyers. Debt buying can reduce the losses that creditors incur in providing credit, thereby allowing creditors to provide more credit at lower prices. Debt buying, however, also may raise significant consumer protection concerns. The FTC receives more consumer complaints about debt collectors, including debt buyers, than about any other single industry. Many of these complaints appear to have their origins in the quantity and quality of information that collectors have about debts. In its 2009 study, the Commission expressed concern that debt collectors, including debt buyers, may have insufficient or inaccurate information when they collect on debts, which may result in collectors seeking to recover from the wrong consumer or recover the wrong amount. The FTC initiated this debt buyer study in late 2009 for two main purposes. First, the FTC sought to obtain a better understanding of the debt buying market and the process of buying and selling debt. Second, the Commission wanted to explore the nature and extent of the relationship, if any, between the practice of debt buying and the types of information problems that the FTC has found can occur when debt collectors seek to recover and verify debts. Many stakeholders recognize the concerns that have been raised about debt buying, including consumer groups, members of Congress, federal and state regulatory and enforcement agencies, and the debt buyer industry itself. Indeed, the debt buyer industry has launched a self-regulatory effort to address some of these concerns, and the FTC is encouraged by that effort. This study of debt buyers is the first large-scale empirical assessment of the debt buying sector of the collection industry. The FTC hopes that its findings contribute to a greater understanding of debt buying, enhance ongoing reform efforts, and prompt further study of the industry. To conduct its study, the Commission obtained information about debts and debt buying practices from nine of the largest debt buyers that collectively bought 76.1% of the debt sold in 2008, with six of these debt buyers providing the information the Commission used in most of its analysis. The FTC also considered its prior enforcement and policy work related to debt collection, as well as available research concerning debt buying. The study focused on large debt buyers because they account for most of the debt purchased; it did not address the practices of smaller debt buyers that are a frequent source of consumer protection concerns, a limitation that must be considered in evaluating the study's findings. The Commission

acquired and analyzed an unprecedented amount of data from the studied debt buyers, which submitted data on more than 5,000 portfolios, containing nearly 90 million consumer accounts, purchased during the three-year study period. These accounts had a face value of \$143 billion, and the debt buyers spent nearly \$6.5 billion to acquire them. Most portfolios for which debt buyers submitted data were credit card debt, with such debt accounting for 62% of all portfolios and 71% of the total amount that the buyers spent to acquire debts. In addition to these data, the debt buyers provided copies of many purchase and sale agreements between themselves and sellers of debts. The debt buyers also submitted narrative responses to questions concerning their companies and their practices, as well as the debt buying industry. The key findings of the study are as follows:

Now in its fourth edition, authors Greg Siskind and Elissa Taub provide the most up-to-date information regarding immigration for foreign physicians in *The Physician Immigration Handbook*. Physician immigration is perhaps the most complicated area of U.S. immigration law, but *The Physician Immigration Handbook, 4th Edition*, simplifies that process in a way that is easy to follow and understand. Updated annually, *The Handbook* explains what foreign physicians need to know to apply for graduate medical training at American teaching hospitals in the United States and how they can remain in the United States to pursue their careers. *The Physician Immigration Handbook* follows the typical American journey for the international medical graduate (IMG). First, the *Handbook* reviews the application process through which physicians receive ECFMG certification, eventually leading to admittance to U.S. graduate medical training programs. Then it discusses the two major immigration pathways open to IMGs who want to come to the United States for graduate medical training: the J-1 visa and the H-1B visa. The *Handbook* walks the IMG through training to post-training work, then on to permanent residency (the "green card" process) and ultimately to U.S. citizenship. It even delves into employment issues, such as layoffs, mergers, and acquisitions, while also discussing special benefits available to foreign physicians in the U.S. military. *The Physician Immigration Handbook* was written as a guide for IMGs, recruiters, human resource professionals, and even government officials who need to know how the U.S. immigration system works and the special rules applied to physicians within that framework. The *Handbook* includes 24 chapters in an easy-to-follow, question-and-answer format: Qualifying for Graduate Medical Training in the United States The J-1 and the H-1B Visas Seeking a Visitor Visa to Pursue Graduate Medical Training J-1 Visas for Graduate Medical Training The J-1 Home-Residency Requirement Conrad 30 Waivers 'Public Interest' Waivers Hardship and Persecution Waivers J-2 Status for Family Members of a J-1 Exchange Visitor The H-1B Visa Process Cap-Exemption Strategies for the H-1B Visa H-4 Family Members Accompanying an H-1B Visa Holder Consular Processing of Nonimmigrant Visas Lawful Permanent Residency Obtaining Permanent Residency Through PERM Labor Certification National Interest Waivers Other Paths to Achieving Permanent Residency Obtaining U.S. Citizenship The Impact of Employment Termination The Impact of Mergers and Acquisitions Immigration and the Locum Tenens The Role of Physician Recruiters Special Issues Affecting Canadian Physicians Hiring an Immigration Attorney. The *Handbook* also includes numerous helpful appendices and charts, plus sample questionnaires: Resources and Websites of Interest; Physician Licensing Requirements by State; Physician National Interest Waiver Chart; Preliminary Immigration Questionnaires for Physicians and Physician Employers; J-1 Interested Government Agency Physician Waiver Flowchart; Flowchart for Physicians on Training H-1Bs; Conrad 30 State Chart.
