The Process Mining Manifesto by the IEEE Task Force on Process Mining distinguishes

between three types of process mining techniques: Discovery:

Discovery process mining techniques are used to identify

processes and create process models.

Conformance:

Conformance process mining techniques are used to identify

processes and create process models.

Conformance:

Conformance process mining techniques are used to identify

## Mining in Finance

Process mining is a family of techniques in the field of process management that support the analysis of business processes based on event logs.

During process mining, specialized data mining algorithms are applied to event log data in order to identify trends, patterns and details
