In his later works, including *The Ecological Approach to Visual Perception* (1979), Gibson became more philosophical and criticized cognitivism in the same way he had attacked behaviorism before, arguing strongly in favor of direct perception and direct realism, as opposed to cognitivist indirect realism. He termed his new approach "ecological psychology".

The ecological approach to visual perception was a radically novel proposal 40 years ago, and many of the concepts it introduced are still of great relevance today. The embodied cognition programme in psychology owes a great deal to it, and the affordance-centric approach to perception is a common idea in modern robotics. Some of the main ideas in this book are [...]

In vision, this emphasis on the interdependence between a real agent and its environment is often referred to as the Ecological Approach to Visual Perception, as coined by JJ Gibson in his 1979 book with the same title. The goal of this course is to concretely explore this general perspective of an agent in its environment.
