Despite the range and abundance of autobiographical writing from the Anglophone Caribbean, this book is the first to explore this literature fully. It covers works from the colonial era up to present-day AIDS memoirs and assesses the links between more familiar works by George Lamming, C. L. R. James, Derek Walcott, V. S. Naipaul, and Jamaica Kincaid and less frequently cited works by the Hart sisters, Mary Prince, Mary Seacole, Claude McKay, Yseult Bridges, Jean Rhys, Anna Mahase, and Kamau Brathwaite. Sandra Pouchet Paquet charts the intersection of multiple, contradictory viewpoints of the colonial and postcolonial Caribbean, differing concepts of community and levels of social integration, and a persistent pattern of both resistance and accommodation within island states that were largely shaped by British colonial practice from the mid-seventeenth through the mid-twentieth century. The texts examined here reflect the entire range of autobiographical practice, including the slave narrative and testimonial, written and oral narratives, spiritual autobiographies, fiction, serial autobiography, verse, diaries and journals, elegy, and parody.

To understand how China is shaping the twenty-first century, China Dreams eavesdrops on conversations between officials, scholars, bloggers, novelists, film-makers and artists. Rather than pitting Confucian China against the democratic west, Callahan weaves Chinese and American ideals together to describe a new "Chimerican dream".

How could the Chinese Communist Party (CCP) not only survive but even thrive, regaining the support of many Chinese citizens after the Tiananmen Square crackdown of 1989? Why has popular sentiment turned toward anti-Western nationalism despite the anti-dictatorship democratic movements of the 1980s? And why has China been more assertive toward the United States and Japan in foreign policy but relatively conciliatory toward smaller countries in conflict? Offering an explanation for these unexpected trends, Zheng Wang follows the Communist government's ideological reeducation of the public, which relentlessly portrays China as the victim of foreign imperialist bullying during O ne hundred years of humiliation. O By concentrating on the telling and teaching of history in today's China, Wang illuminates the thinking of the young patriots who will lead this rising power in the twenty-first century. Wang visits China's primary schools and memory sites and reads its history textbooks, arguing that China's rise should not be viewed through a single lens, such as economics or military growth, but from a more comprehensive perspective that takes national identity and domestic discourse into account. Since it is the prime raw material for constructing China's national identity, historical memory is the key to unlocking the inner mystery of the Chinese. From this vantage point, Wang tracks the CCP's use of history education to glorify the party, reestablish its legitimacy, consolidate national identity, and justify one-party rule in the post-Tiananmen and post-Cold War era. The institutionalization of this manipulated historical consciousness now directs political discourse and foreign policy, and Wang demonstrates its important role in China's rise.

The rise of China could be the most important political development of the twenty-first century. What will China look like in the future? What should it look like? And what will China's rise mean for the rest of world? This book, written by China's most influential foreign policy thinker, sets out a vision for the coming decades from China's point of view. In the West, Yan Xuetong is often regarded as a hawkish policy advisor and enemy of liberal internationalists. But a very different picture emerges from this book, as Yan examines the lessons of ancient Chinese political thought for the future of China and the development of a "Beijing consensus" in international relations. Yan, it becomes clear, is neither a communist who believes that economic might is the key to national power, nor a neoconservative who believes that China should rely on military might to get its way. Rather, Yan argues, political leadership is the key to national power, and morality is an essential part of its way. Economic and military might are important components of national power, but they are secondary to political leaders who act in accordance with moral norms, and the same holds true in determining the hierarchy of the global order. Providing new insights into the thinking of one of China's leading foreign policy figures, this book will be essential reading for anyone interested in China's rise or in international relations. In a new preface, Yan reflects on his arguments in light of recent developments in Chinese foreign policy, including the selection of a new leader in 2012.

China is rising. But how should the West - and the United States in particular - respond? This could be the key geopolitical question of the twenty-first century, according to strategic expert Hugh White, with huge implications for the future security and prosperity of the West as a whole. The China Choice confronts this fundamental question, considering the options for the Asian century ahead. As China's economy grows to become the world's largest, the US has three choices: it can compete, share power, or concede leadership in Asia. The choice is momentous - as significant for the future as any the US has ever faced. China is already more formidable than any country the US has faced before - and if America does not want to find itself facing China as an enemy, it must accept it as an equal partner. Weighing the huge difficulties of accepting China as an equal with the immense cost and risks of making it an enemy, in the end the choice is simple, even if it is not easy. The US simply must share power with China in Asia. The alternative is too terrible to contemplate.

Brings together leading scholars to analyse the central issues of power, order, and change in world politics.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

With unique access to Chinese leaders at all levels of the party and government, best-selling author David M. Lampton tells the story of China `s political elites from their own perspectives. Based on over five hundred interviews, Following the Leader offers a rare glimpse into how the attitudes and ideas of those at the top have evolved over the past four decades. Here China `s rulers explain their strategies and ideas for moving the nation forward, share their reflections on matters of leadership and policy, and discuss the challenges that keep them awake at night. As the Chinese Communist Party installs its new president, Xi Jinping, for a presumably ten-year term, questions abound. How will the country move forward as its explosive rate of economic growth begins to slow? How does it plan to deal with domestic and international calls for political reform and to cope with an aging population, not to mention an increasingly fragmented bureaucracy and society? In this insightful book we learn how China `s leaders see the nation `s political future, as well as about its global strategic influence.
