Overview. Weaponeering is the process of estimating the quantity of a specific type weapon required to achieve a specific level of damage to a given target, considering target vulnerability, weapon effects, munition delivery errors, damage criteria, probability of kill, weapon reliability, etc. It is the third phase in the conceptual targeting process, but it is embedded into target development,

Weaponeering is the field of
designing an attack with
weapons. It is a portmanteau
of weapon and engineering.
The term should not be

Download File PDF Weaponeering Guide

confused with weapons engineering, which is the actual engineering design and development of weapon systems. The United States Department of Defense defines the term as the process of determining the quantity of a specific type of lethal or nonlethal weapons required to achieve a specific level of damage to a given target, considering target vulnerability ...
